

# EUROPEAN DIGITAL CAMPS FOR THE INCLUSION OF YOUTH WITH RETINOBLASTOMA

Spaces for the digital and social construction of youth with retinoblastoma in Europe

PROJECT NUMBER: 2023-1-ES02-KA220-YOU-000152874

## NEWSLETTER #2

### PROJECT IN PROGRESS

### MEETING WITH THE PARENTS

NDU Foundation hosted meeting with parents, families, patients and youth technical experts, between 18th and 20th October 2024. Around 50 families with retinoblastoma patients aged between 15 months up to 50 years old attended the meeting. The 10 guests (2 oncologists and 3 ophthalmologists, 1 software developer, 1 anesthesiologist and 3 representatives from similar projects) attended the round table with participants and discussed many unresolved issues. The meeting was followed by some practical activities.

### PILOT TEST #1

As we proceed with the development of the FunCamps Digital platform, we target to reach parents and those addressing children having retinoblastoma. Thus, the FunCamps shall provide activities where parents and children will connect, and build on their relationship, forget about difficult moments and enjoy their time together.

For this reason, we tend to test activities developed together with parents and children. On 20th October 2024 NDU Foundation together with Artistes du Monde for Kids, implemented activities to test the usability of the material developed so far.

**Co-funded by  
the European Union**
